PRODUCT DESIGN | DESIGN LEADERSHIP | DESIGNOPS
DESIGN SYSTEMS | 0 → 1 PRODUCT DEVELOPMENT | AI NATIVE PRODUCTS

01 PROFILE

Design Manager and product design leader with **11+ years** across **product design**, **design systems** and **DesignOps**. I joined a two person design function with no established practice and **grew it to twenty**, bringing design fully in house and building the career paths, rituals and operating systems behind it. Most recently I led **WorkPerks**, a **0 to 1** employee benefits product now in pilot, and built the app myself, using **AI assisted development** to carry it from product definition to a working React Native product. I work best on complex products: many moving parts, several kinds of user, and no obvious shape yet.

02 CAPABILITIES

LEADERSHIP
Team building & hiring · Career frameworks & mentoring · Design culture & critique · CXO and stakeholder communication · Cross functional partnership with product, engineering and business

PRODUCT
0 to 1 product development · Product strategy & definition · Enterprise, healthcare and consumer UX · Complex multi product ecosystems · Information architecture · UX research

SYSTEMS & OPS
Design systems (foundations, tokens, components, patterns, governance, adoption) · DesignOps · Allocation planning · Design quality & evaluation frameworks · OKRs · Skill mapping

AI-NATIVE
AI assisted development with Claude Code · Design to code workflows · React Native · Rapid prototyping · Conversational and AI interaction design

03 EXPERIENCE

01 Bajaj Finserv Health
2019 to Present · Pune, India

DESIGN MANAGER (CURRENT) · LEAD DESIGNER · SENIOR UX DESIGNER

2 → 20	100%	12	3×	40%	2.5M+
DESIGNERS	IN-HOUSE DESIGN	PROMOTED	DELIVERY VELOCITY	FEWER NAV STEPS	APP DOWNLOADS

- Grew the design function from **2 to 20 designers**, structured into pods, without diluting culture or the quality bar.
- Reached **100% in house design ownership** by building the business case for the transition and eliminating agency dependency through a phased 12 month plan.
- **Promoted 12 designers internally**, on the back of a competency framework, skill mapping and growth plans I built so no promotion or development decision ever came as a surprise.
- Led **WorkPerks**, a 0 to 1 employee benefits platform, from product definition through experience architecture, design system and product behaviour, and built the employee app in React Native using AI assisted development. Currently in pilot.
- Created **Capsule**, the organisation's first design system, covering foundations, tokens, components, patterns and governance, unifying three products under one language and now spanning roughly 100 screens.
- Owned design across **HRX** (consumer), **DRX** (clinical) and Salesforce CRM; the research led redesign of DRX doctor consultation workflows **cut navigation steps by 40%**.
- Established the organisation's first structured UX research programme and embedded it as ongoing practice.
- Design delivery velocity improved **3x** through a component based workflow and shared system infrastructure; consumer experience work contributed to **2.5M+ app downloads**.
- Put designers in front of CXOs with one rule, *if you designed it, you present it*, moving design into product strategy conversations rather than execution requests.
- Built the **DesignOps operating system** across five pillars:

DESIGNOPS OPERATING SYSTEM

01	02	03	04	05
Org & team growth	Process & delivery	Planning & resources	Quality & governance	Career growth

02 Decos

2015 to 2019

UX DESIGNER

- Decos is a leading Netherlands based company specialising in software for businesses, spanning enterprise resource planning (ERP), document management and workflow automation.
- Owned user experience design across **5 products**, including **2 products taken from inception to execution**, shaping the concept, the experience and the shipped interface.
- Focused on intuitive interfaces built on a deep understanding of user needs, turning that understanding into design decisions that reached real users.

03 Tata Consultancy Services

2014

UX DESIGN INTERN

- Contributed to **Darshanarthi**, the TCS visitor management system, working alongside senior designers on wireframes and prototypes that improved user interaction and usability.
- Ran user research and usability testing, gathering feedback and folding it back into refined design solutions. The internship grounded my UX and UI practice in real methods, tools and team collaboration.

04 SELECTED PRODUCT EXPERIENCE

WorkPerks — PILOT

AI-NATIVE 0 → 1 PRODUCT

0 to 1 employee benefits platform sitting on top of an organisation's existing HR systems: flexi, wellness, rewards, OPD, recognition, reimbursements. Led the product; built the app.

Product Definition – Experience Architecture – Design System – React Native – AI Assisted Development

Capsule — SYSTEM

DESIGN SYSTEM · ~100 SCREENS

The organisation's first design system, built from zero to the infrastructure design and engineering now build on. ~100 screens, three products, one language.

Foundations – Tokens – Components – Patterns – Governance

Vytals — PRODUCT

HEALTHCARE PRODUCT ECOSYSTEM

Healthcare product ecosystem across roughly six product areas: product experience, visual language, and PDF and interactive report journeys.

Product Experience – Visual Language – Report Journeys

AI Design OS — CONCEPT

DESIGN OPERATING MODEL

A model for how a design organisation operates when AI enters the loop: strategy, product thinking, experience, systems, build, quality and knowledge.

Strategy – Systems – Build – Quality – Knowledge

05 A NEW WAY TO BUILD

WorkPerks gave me the opportunity to expand how I work, using AI-assisted development and Claude Code to take product decisions through to implementation.

I led the product definition, experience architecture, interaction design and quality bar while using AI to accelerate exploration, code generation, implementation and iteration across the stack.

06 RECOGNITION

2023 — **Stellar Award**, individual recognition at Bajaj Finserv Health.

2024 — **Best Team Award (AOP)**, Bajaj Finserv Health's highest team recognition, awarded across every team in the company. Cited for output quality, team culture and cross functional collaboration.

2024 — **Top 30 Women**, Bajaj Leadership Program.

07 EDUCATION

Jul 2010 to Apr 2015 — **MIT Institute of Design**, Bachelor's degree, User Experience.

1996 to 2009 — **Bishop Johnson School, Prayagraj**, ISC Board.
